KONU: Regarding Topic Selections for the 2026–2027 Academic Year Graduation Project

Dear 5th-Year Students,

The Graduation Project topics to be offered for the **2026–2027 Academic Year** are shared in the attachment.

Please carefully review the principles governing the selection and conduct of the Graduation Project course:

- *To be eligible to enroll in the Graduation Project course, students must be entitled to take 5th-year courses and must not have more than 15 ECTS credits of outstanding courses remaining for the following Spring semester.*

Both the **Bachelor’s Dissertation Topic Selection Form** (ECF-F056) and an **online form application** will be used during the preference process. Students are required to submit their preferences completely through both methods.

Please note the following:

- The ECF-F056 **Bachelor’s Dissertation Topic Selection Form** must be completed fully and in accordance with the relevant rules and must be signed by the advisor and the student.
- The preferences indicated on the Graduation Project Preference Form must also be entered into the online form application provided separately: <https://forms.gle/dw6jt7tdHTjZfw9X9>
- Students who already have an approved/ongoing project and wish to continue with the same project must indicate that topic as their first preference and attach a declaration letter signed by the relevant faculty member to the preference form.
- The preference process must be completed in full by **23 September 2026**.
- The original signed copy of the preference form must be submitted in person, against signature, to Doğa Evrim KOÇAK at the Faculty Secretariat no later than **30 September 2026**.
