### COURSE "CBRNe Disaster & Incident Medical Management"

**Introduction:** The escalating prevalence of natural, incidental, and intentional CBRNe (Chemical, Biological, Radiological, Nuclear, and Explosive) threats has underscored the crucial need to enhance risk analysis, preparedness, mitigation, response, and recovery capabilities in the face of unconventional events or incidents. In response to this demand, we are pleased to announce a comprehensive training course designed to equip participants with the essential knowledge and skills required for the effective management of CBRNe events at both regional and national levels. Moreover, the course goes beyond theoretical learning, offering a unique practical exercise conducted at the CBRN Department of University of Health Sciences. This activity will provide trainees with hands-on experience and practical insights, ensuring their preparedness to handle real-life scenarios.

**Training program general objective:** The Course covers an extensive range of essential subjects related to CBRNe materials, prevention, protection measures, medical procedures, risk assessment, response to CBRNe events/incidents, and inter-agency coordination and communication. Throughout the Course, attendees will actively participate in discussions and interactive sessions, fostering a dynamic learning environment. To ensure a comprehensive training experience, CBRN exercise simulations will be conducted using EMS training manikins, PPEs, gas masks, along with a decontamination station. The organizing institutions will issue a final certificate of attendance.

**Target Group:** This specialized course is tailored to cater to emergency management personnel, emergency medical services, fire service personnel, governmental administrative staff, healthcare professionals, law enforcement personnel, armed forces, public health officials, public safety communications experts, and public works personnel. By attending this comprehensive training program and participating in the practical exercise at the state-of-the-art facilities of the CBRN Department at the University of Health Sciences, participants will be equipped with the necessary expertise to confidently handle CBRNe events and effectively collaborate with diverse agencies during crises.

- Course Main Topics:**
- CBRNe risks and new threat scenarios.
  - CBRN agents
